

**PQWG – Protection task-force**  
**MEETING**  
**07.10.2020**

Topic	ACTION POINT
<p><b>1. Welcome and introduction</b>  ECHO, FAO, Plan International, War Child, WFP,</p>	
<p><b>2. Refresher on the outcomes of the gFSC Survey on Protection</b></p> <p>a) FSC teams in the field seem to have been involved in joint work at the inter-cluster level and/or with other clusters on areas related to protection and gender: <b>Best-known areas:</b> protection mainstreaming, disability inclusion, gender equality and women’s empowerment, AAP (including PSEA), gender analysis. <b>Least known:</b> security sector reform, DDR and demining, Housing, Land &amp; Propr, ICLA and Soc. Inclusion – indigenous people.</p> <p>b) <b>Type of support</b> which could be most useful for the FSC teams and partners, if merging all areas/countries: <b>guidance</b> (checklist, draft SOPs, tools), <b>capacity strengthening</b> (including training tools), <b>exchanges of experiences and lessons learnt</b> between members (community of practices).</p> <p>There is a different situations across countries, that is why some areas may be less relevant according to the Survey (e.g. HLP or demining) but could still be very relevant topics to be considered.</p>	
<p><b>3. Discussion on expectation and priorities of the task-force</b></p> <p>Since food security and protection have strong complementarity and would be good to consider a more operational support; focus on info sharing and capacity building is fine but areas to be considered are also on targeting, harmonisation of indicators, inter-operability, common feedback mechanisms: (example can be capitalised from different region/contexts, centre of excellence: WFP/UNHCR). Products compilation and sharing can be a starting point as well as the creation of the helpdesk.</p> <p>Task force to take into consideration also the child protection reference group; In addition some ad hoc target can be applied for countries that show interest in some particular areas.</p> <p>HNO/HRP support: A tip-sheet/one-pager doc on concrete steps to be taken in the overall HNO/HRP process and in the writing of the document.</p>	<p><b>Organisation to come up with practical examples from areas of expertise/countries or evidence based documents (next meeting)</b></p> <p><b>Maria, Maria B. and Stefano volunteered to</b></p>

<p>(e.g. HNO/HRP narrative, FSC session to show data as much as possible in a disaggregated way, HRP target to be disaggregated by sex and age, to mention to AAP and PSEA, etc)</p> <p>Was mentioned that a similar doc regarding the HPC already exists, however that is a matrix used to conduct the HRP project peer review and vetting process – that can be a starting point or doc for the abovementioned doc on HNO/HRP FSC narrative support</p> <p><b>4. Parallel ongoing initiatives</b> Plan international work plan on child protection Interagency child protection reference group LEGS is organising a webinar on gender and livestock in emergencies next 15th of October Newly launched platform (ALNAP) was mentioned;</p>	<p><b>start the doc that can be shared with the group.</b></p>
<p><b>5. Next meeting – will be decided via doodle</b></p>
