After almost eight months since the start of Round 3 distribution in Tigray in mid-October 2021, partners have assisted 2,572,120 people (41% of the total planned caseload of 6.3 million people) with 36,131 MT of food across the region as of 08 June. Among the main partners: JEOP partners assisted 969,676 people (25% of its planned caseload of 3.96 million people) with 11,925 M of food in Mekelle, Central, Eastern, South Eastern and Southern Zones; and WFP and its partners assisted 1,602,444 people (75% of its planned caseload of 2.14 million people) with 24,206 MT of food in North Western and Southern Zones.

* The targets and people assisted are presented cumulatively by round. The round, supposed to be a six-week cycle, has stretched almost eight months since its start in Tigray in mid-October 2021.

Between 02 - 08 June, at least 342,807 people were assisted with 5,303 MT of food in Central Zone (Adwa town, Axum town, Chila, Edaga Arbi, Emba Sieneti, Endefaelis, and Kola Temben), Eastern Zone (Aguale, Erob, Gulo Mekeda, Kelete Aweilallo, and Wukro town), North Western Zone (Adi Daero, Adi Hageray, Asgede, Laelay Adilabo, Tahtay Adiyabo, Tahtay Kororo, and Tselemli), South Eastern Zone (Adigudom, Samre, and Wajirat) and Southern Zone (Emba Alaje, Neqsege, Ofa, and Selewa). Due to fuel scarcity, food partners have not been able to scale up dispatch and distribution at full speed since late May. As of 15 June, food partners urgently require at least 240,000 L of fuel to complete Round 3 distribution.

Since food supplies started to enter Tigray through humanitarian convoys in early April, reports have been received confirming that at least around 20,130 MT of food has been distributed to around 1,259,000 people in Central (134,000), Eastern (109,000), Mekelle (123,300), North Western (700,700), Southern Eastern (59,000) and Southern (133,000) zones (in addition to assistance for refugees in North Western Zone) as of 08 June. The rest of the completed and ongoing distribution is awaiting updates from the field with some delays due to communication challenges. The number of people assisted is expected to be revised upwards as soon as the distribution reports become available.
