# Seasonal Hazards

# Seasonal Calendar

Source: Development of Upazila Disaster Management Plan  
 Developed By: Upazila Disaster Management Committee, Ukhia

# Seasonal hazards response

**The monsoon season will last for 7 months (April – October)**

1. GFD to continue: distribution points to be enhanced, road, access, log hub
2. GFD to be transferred to e-voucher system (90,000 now + 90,000 new refugees in March) and 11 new shops to be built;
3. Fortified biscuits and cooked meals distributions to be continued for most vulnerable and new influx;
4. Fresh food top up distributions (access to market) to be continued

# Seasonal hazards response

## Main challenges:

**Access:** access to distribution points will be difficult especially for the most vulnerable;

**Mitigation:** improve the road to distribution points (cash for work, FFA), use of volunteers/ porters to bring food to distribution points from log hub; porters to support the most vulnerable to access their rations;

**Cooking fuel:** firewood utilization will be more difficult

**Mitigation:** LPG to be distributed (shelter/nfi sector), self-reliance packages and training, common kitchen to be established for sharing cooking utilities;

# Seasonal hazards response

In case of shock (cyclone, flood, landslide)

1. Scale up distribution of fortified biscuits as emergency response for the first 72hrs
2. Scale up the production of cooked meals to target the most vulnerable/displaced/relocated;
3. Mobile distribution of food where necessary and/or readdress the GFD to new area (if relocation will be possible)

# Seasonal hazards response

**Assumption:** 102,000 people to directly affected by landslide/flood

**Fortified biscuits:** WFP – 100,000 (yearly plan) monsoon pipeline to be confirmed;

**Cooked meals:** 9+1 kitchen serving 14,500 individuals/day to be scaled up (ACF): capacity 10,000 individuals/day/kitchen

**Cooked meals:** 30,000 individuals/day (TIKA);

**Cash for work/FFA:** 10,000 individuals to be involved for distribution points access enhancement;

**Porters:** additional workers to be involved

# AoB

- JRP Template **to be completed by the 9<sup>th</sup> of February**, any issue in filling the template?
- Pre-assistance baseline study (FSS-VAM) to be compared with REVA (impact of assistance)
- FSS-VAM - Monitoring of FS to be conducted during the monsoon season
- Energy and environment WG meeting today
- Livelihoods WG every other week
